### DETAILED ACTION

Claims 23-51 are pending. Drawings, 9 sheets, were filed with the application. Foreign priority was not claimed.

#### *Election*

Applicant's election without traverse of Group I, claims 23-35 in the reply filed on June 6, 2005 is acknowledged. Claims 48-49 drawn to pharmaceutical compositions have been included as they are of the same scope as the method and compound claims. *Claims 23-35, 48, 49 will be examined.*

Claims 36-47, 50-51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 6, 2005.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### *Information Disclosure Statement*

The examiner has considered the IDS. References were not present in the parent application. Please supply a copy of the non-patent literature references not considered for future consideration.

#### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 1625

Claims 23-36 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-13 of prior U.S. Patent No. 6,710,073 B1. This is a double patenting rejection.

Regarding claim 23, the formula in the patent claims is incorrect. It should read as presented at column 7 lines 50-68 of USP '073, the lactones. The examiner's determination is based upon what is disclosed in the specification. Note that the compounds are not structurally similar to the esters depicted at column 8 lines 25-35.

Regarding claims 24-36, the invention is the same as set forth in the patent claims 2-13. The sole difference is the preamble. However, the claims are directed to the 'same invention' as additional preamble results in a difference that is semantic rather than actual.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 48,49 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 of U.S. Patent No. 6,710,073 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to the same generic concept.

USP '073 teach the claimed compound. The difference is that the patent does not have any 'composition' claims.

Motivation to prepare the compositions arise as claiming an unpatentable compound in combination with a carrier does not render the combination patentable if it would be obvious in

Art Unit: 1625

the prior art to utilize a carrier with the compound. USP '073 in claim 1 clearly teaches the compound and at column 3 lines 53-64 clearly teach the compound capable of forming pharmaceutical compositions.

*Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

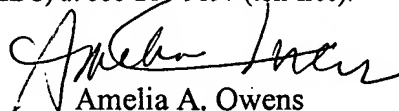

Claims 48-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are self conflicting because the claims are drawn to pharmaceutical compositions without a dosage limitation. Please note that a pharmaceutical composition by definition cannot be either ineffective or toxic. Therefore a pharmaceutical composition without any dosage is self conflicting. It is recommended that the term 'therapeutically effective amount' be incorporated into the claims.
